

**FSMTA Executive Board Meeting  
November 2010**

After some discussions with the University of Central Florida's archivist, she made the suggestion that all the Florida organizations could send their information to be saved at the UCF archives. Each organization's information would be stored in their own file, under FSMTA. I believe this would be a great thing to consider in the event a member of a district, not close by, needed some information. I understand that many districts would like to keep the information close to home for their own referral. But most information is in duplicate form and a copy could still be stored at a local archive. If this is not agreeable, I believe organizations should consider housing their information at a local library or public facility. This makes it more easily accessible for anyone that might want to search the archives. But by storing FSMTA and all the Florida district's information together, in one location, makes a nice unified archives with information readily available for everyone.

The archivist also made the offer to send someone to a meeting if everyone would like to hear more about what information UCF archives will store and how they like to receive the information.

**Respectfully submitted,**

**Tammy Davis
